

**FOUNTAS GROUP**  
HAEMODIALYSIS CENTER

**For a life that  
keeps only what  
is good for you.**

## Panagiotis I. Fountas has established Fountas Group of Companies throughout his 40 years career in the field of haemodialysis.

Having graduated from **Athens Medical School**, he started his career as a nephrologist.

However his vision and passion to **make** renal **patients' life easier** and more comfortable led him gradually to orchestrate a group of companies with a common denominator, **HAEMODIALYSIS**.

**Dr Fountas** was aware that providing the **highest quality services** meant producing your own haemodialysis solutions , importing and

distributing your own dialyzers, your own haemodialysis monitors and follow closely everything regarding haemodialysis.

Dr Fountas vision was to provide premium services, a patient-centric approach and control the complete lifecycle and parameters of a hemodialysis treatment.

The result of Dr Fountas' forward thinking as well as the precious contribution and careful selection of more than 100 expertise personnel and

partners is that he managed to be in charge of a group of four companies:

Nephrolife Dialysis Center (the successor of Pantokrator medical clinic), Filoxenia Dialysis Center, Nephroclinik SA and Dialmedica SA.

Dr Fountas short term plans foresee a third dialysis unit in a proprietary building in the heart of the city center of Athens as well as expansion of activities in the international market.

- 1 Nephrolife, **Glyfada**
- 2 Filoxenia, **Aigio**
- 3 Nephroclinik SA, **Livadeia**
- 4 Dialmedica SA, **Athens**

*“My vision was to provide premium services to my patients”*

Nephrolife

1

Glyfada — Athens, GR

...we have established a highly sophisticated and luxurious Hemodialysis center in the district of Glyfada, in Athens, Greece conforming to all international standards.

## **Nephrolife**

El. Venizelou 30,

## **Nephrolife**

**Having the will to  
provide the highest  
quality of medical  
services and safety...**

Glyfada ——— Athens, GR

...we have established a highly sophisticated and luxurious Hemodialysis center in the district of Glyfada, in Athens, Greece conforming to all international standards.

NEPHROLIFE, is  
situated in the  
seaside idyll of the  
Athenian Riviera at  
the south western  
water-front of  
the capital.

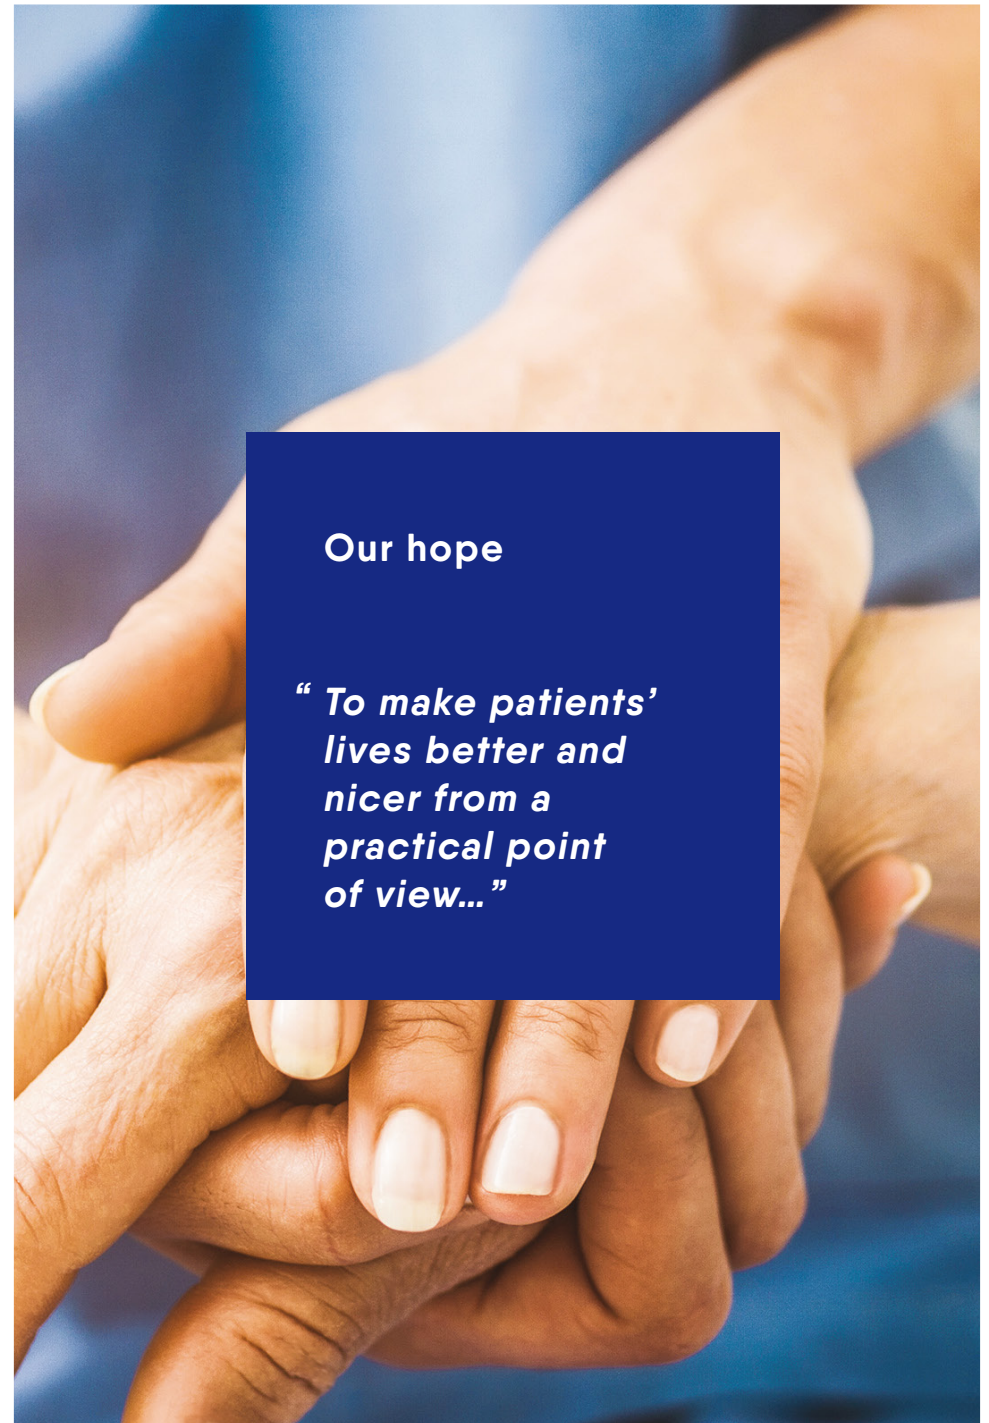

Beach view at Glyfada — Athens, GR

In an area with a **plethora of 5-star seaside hotels, beautiful beaches**, the **Vouliagmeni Lake**, important attractions such as the historical **Greek Parthenon, Akropolis**, the picturesque cobblestone roads of **Plaka** and endless options for fun are situated around the area or very closely. The unit is also well connected with public transportation.

Our hope

*“ To make patients’  
lives better and  
nicer from a  
practical point  
of view...”*

## This area is the best place for those who would like to combine relaxation and holidays;

Nephrolife is just 2 kilometers away from Glyfada's beaches and 10 kilometers away from the pristine waters of Laimos Vouliagmenis.

A few miles away Sounion with the outstanding beaches, the great Greek tavernas, the sunset over the Aegean sea and loads of ancient ruins most importantly the Greek temple of Poseidon offers a unique opportunity for a day excursion.

## Travel & Dialysis

Nephrolife can host people from all around the globe. High quality hospitalization, the warm and specialized personnel as well as practicality in dialysis patients' and their family's life makes everyone to feel like home.

As a top quality and high-tech equipped Dialysis Unit Nephrolife can offer all kind of hemodialysis methods from **standard/nor-mal Haemodialysis**

**Treatment, High-Flux Hemodialysis to Online Hemodiafiltration (HDF) and Online Hemofiltration (HF).**

### 2km

from Glyfada's beaches

### 10km

from the pristine waters of Laimos Vouliagmenis.

### 25km

away from Sounio

### 15km

from Athens International airport

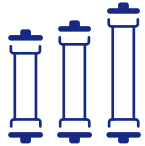

## Services

### The center provides:

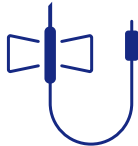

#### 33 modern dialysis machines

with a capacity of hosting 200 people following up the most advanced technology in the field of dialysis. The most sophisticated monitors, currently the last version of B Braun (Dialog+ Evolution) offer an innovative, efficient and optimal treatment.

#### Helbio

low-flux & high-flux dialyzers of various sizes

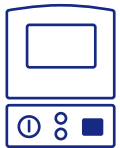

#### Fistula needles

for safe and risk-free dialysis

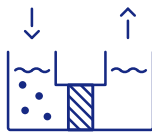

#### Specialized anatomical dialysis beds

with a personal TV, set headphone equipment, as well as Internet stations.

#### In house

specialized Department of Technical Services monitoring all new haemodialysis technologies

#### Water treatment

with double reverse osmosis, online system, UV lamp and constant microbiological control

#### Travel Arrangements

We can take care of all your travel arrangements such as flights, accommodation etc.

#### Snacks & Drinks

for the patients' escorts that can relax in our comfortable and luxurious areas

#### Laboratory

for the patients' medical examinations (blood tests etc) Affiliation with Diagnostic Centers for urgent vascular access and all the necessary and more specialised examinations according to doctor's advice.

#### Modern ambulance

for transport to and from the Centre as well as for the emergencies.

#### Company car

offering transportation to and from the Centre

#### Experienced and expertise

doctors and staff willing to offer their best for a successful and safe dialysis

#### 24-hour contact

with a doctor willing to cover any urgent needs

#### Sterilization

of dialysis machines after every dialysis session

#### Private parking

## Filoxenia

2

The vision is to provide safety, hospitality and the highest standards to renal patients from all over the world, wishing to have their summer or winter vacations in Greece.

## Filoxenia

Rododaphnie

## Filoxenia

**Filoxenia Hemodialysis Center,  
was established by Fountas  
group of companies more  
than 15 years ago.**

The vision is to provide safety, hospitality and the highest standards to renal patients from all over the world, wishing to have their summer or winter vacations in Greece.

**This goal is enhanced by the geographical location of Filoxenia in the northwest Peloponnese**

Very close to the

**International port of Patras. Ski center of Kalavrita.**

which someone can visit, not only by road, but also by cog railway passing through magnificent scenery.

## Filoxenia

is also adjacent to some of the most beautiful seashores of Greece, which can be easily reached. The picturesque and verdurous Egio, built on the ancient Eliki, combines its beautiful mountains (Panachaiko, Erimanthos) with its magnificent beaches, which compete with one another in natural beauty and are in the vicinity of Filoxenia.

All the well known archeological sites that have been centers of the classical ancient Greek civilization such as:

---

**Delphi, Olympia, Epidauros, Mycenae, Sparta, Tirinth, Ancient Korinthos, Mega Spileo (Giant Cave), the lake of Stimfalia, etc...**

...can be easily visited by someone due to the geographical location of FILOXENIA, which is in the center of all the above.

## The personnel of Filoxenia

---

medical, nursing and administrative, are at the guests disposal for any information, not only for dialysis matters, but also for anything concerning transportation, communication, room reservations, as well as information about all the above mentioned Archeological Sites, and access to the summer or winter resorts of the region.

## Services

Filoxenia center has medical instrumentation and installations that guarantee a first-rate medical service, in combination with the comfort of a luxurious environment:

### Private ambulance

### Three-fold beds

monitored with private television and Internet stations.

### Laboratory

for a series of health checks

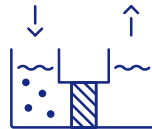

### Snacks & Drinks

for the patients escorts that can relax in our comfortable and luxurious areas

### 33 new generation

hemodialysis monitors.

### Water treatment

with reverse osmosis and online system.

### Bicarbonate

dialysis solutions

### Sterilization

of the machines between shifts

### Special arrangements

for Peritoneal dialysis patients (CAPD).

### In house

specialized Department of Technical Services monitoring all new hemodialysis technologies

### Polysulfone

low and high flux dialysers or any other kind of dialysis membrane deemed necessary, that are intended for the methods of classic hemodialysis or alternate modes of hemodialysis (hemodiafiltration etc).

### Recovery

and Emergency Section, Laboratory.

### Fistula needles

of all kinds and sizes available in the international market.

Nephroclinic SA

3

services has put into operation a unit for the production of hemodialysis solutions. The unit possesses up-to-date, modern equipment for the processing of water and the production of the solutions (an automatic

production).

The raw materials used are of high degree of purity, meeting all the corresponding rules and demands exerted by the E.P.

## Nephroclinic SA

Macedonias 7,  
Athens 10433  
Greece

M. 695 60 34 443  
E. fountaxe@gmail.com

## Nephroclinic S.A is a pharmaceutical manufacturing and commercial company with facilities in Livadia and Athens, Greece.

*It has been operating since 1996 producing pharmaceutical products and haemodialysis solutions.*

### Specifically

---

Nephroclinic S.A's premises are located in Livadia on a 2,500 sqm factory recruiting the most efficient personnel, and maintaining an extended distribution network, covering all state-owned hospitals and private clinics all over the country. The offices are in the center of Athens.

Nephroclinic S.A., in the framework of its various activities has put into operation a unit for the production of hemodialysis solutions. The unit possesses up-to-date, modern equipment for the processing of water and the production of the solutions (an automatic

system of inverse osmosis, stainless steel and HDPE mixing tanks, press-filters for the removal of small and microscopic particles etc) and a fully equipped quality control laboratory carrying out all the necessary test demanded by the European Pharmacopoeia (E.P.) and the International Standards wherever applicable, which assure fully controlled production.

The raw materials used are of high degree of purity, meeting all the corresponding rules and demands exerted by the E.P.

## Nephroclinic S.A

Nephroclinic primarily focuses on manufacturing and marketing all the types of Haemodialysis solutions (Concentrated Acidic Solutions, Concentrate Acetate Solutions used in combination with Concentrate Bicarbonate Solutions,

Solutions mixed in the proportions, Solutions used with Sodium Bicarbonate Cartridges, Solutions for Biofiltration etc) and is licensed by the Greek National Organization for Medicines (E.O.F).

Haemodialysis with bicarbonate is suitable for all types of equipment and, upon client request, in any specific formula. The Packaging is in bidons of 5L and 10L bicarbonate.

The near future goal is apart from maintaining the highest quality of all kind bicarbonate solutions, to extend its pharmaceutical activities and challengingly interfere into new medical fields.

*“We provide high quality standards for increased safety and performance.”*

CE CERTIFICATE

**Dialmedica SA**

4

...complying with the requirements of the Decision 1348/04  
of the Greek Ministry of Health and Social Solidarity  
regarding distribution of medical devices.

### **Dialmedica SA**

Macedonias 7,  
Athens 10433  
Greece

M. 695 60 34 443  
E. fountaxe@gmail.com

**Since 1981 Dialmedica SA concentrates on importing, representing, organizing and distributing dialysers and other equipment for artificial – Kidney units.**

*Dialmedica S.A. is the affiliated company of P.I. Fountas Group of Companies, activated also in the distribution of medical devices in the Greek Market...*

...complying with the requirements of the Decision 1348/04 of the Greek Ministry of Health and Social Solidarity regarding distribution of medical devices.

**At the core of the dialysis process is the dialyzer, a device through which blood circulates and is filtered via a semipermeable membrane.**

Dialmedica provides a wide range of dialyzers with various sizes, designs, sterilization methods and types of synthetic membrane, including Polysulfone, Polyethesulfone and Purema fiber which are manufactured in a specified factory in Switzerland.
