FUE HAIR TRANSPLANT

Medical excellence beyond borders

mediprima

About Us

Mediprima aims excellence in the medical and non-medical services it provides to international patients.

Our primary concern is our patients health and well-being before, during and after the treatment. We will use our experience and insight knowledge only to ensure the whole process is carried out smoothly under outstanding conditions and to the full satisfaction of our patients.

We make sure that our patients give their decisions not on misrepresentations but facts, leading to full control of the whole process.

In order to fulfill the high standards we have set for ourselves, our in-house medical doctor and patient coordinator will work together in evaluating unique needs and wants of the patient as to ensure a satisfying medical travel.

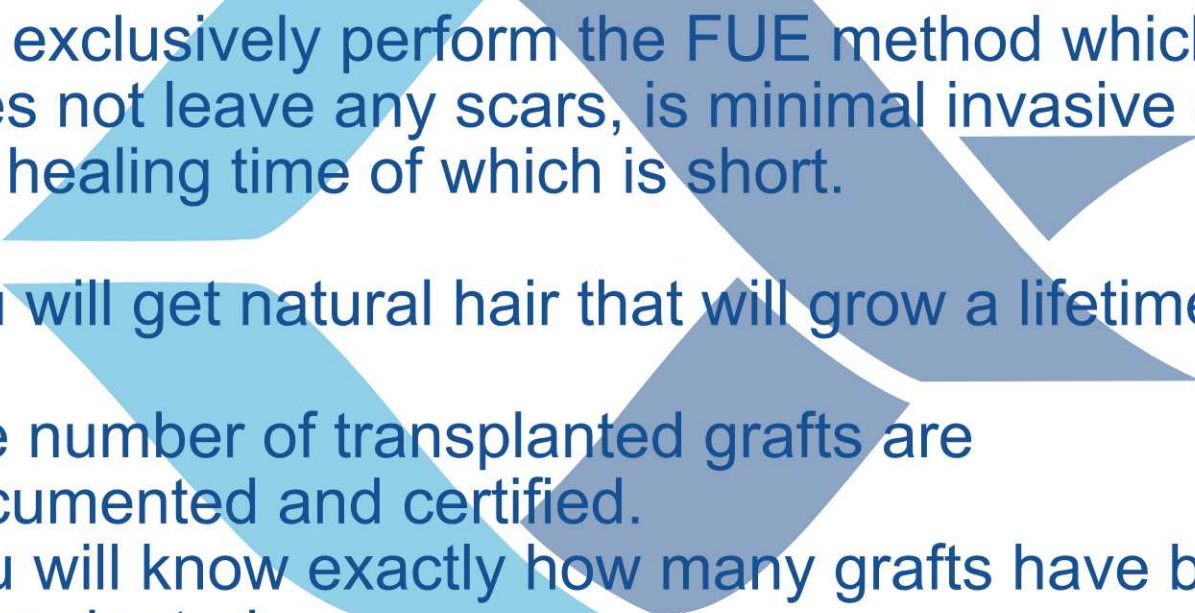

About FUE

FUE hair transplant is the most advanced hair transplant technique. It is the ultimate solution for hair loss. The results are permanent; transplanted hair does not fall off. It is safe and painless under local anesthetics and mild sedation

FUE Transplant has several categories;

-  Micro FUE Hair Transplant
-  DHI hair transplant (unshaven transplant with choi implanters)
-  Beard and mustache transplant
-  Female hair transplant

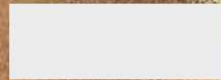

Advantages of FUE Hair Transplant

- 
- ✧ We exclusively perform the FUE method which does not leave any scars, is minimal invasive and the healing time of which is short.
 - ✧ You will get natural hair that will grow a lifetime.
 - ✧ The number of transplanted grafts are documented and certified.
You will know exactly how many grafts have been transplanted.
 - ✧ The procedure is painless, under local anesthesia.
