TOGETHER WE ARE
CREATING A NEW LIFE!

**FERTILITY
TREATMENT**

Latvia, Riga

Clinic EGV was founded in 1998. Our embryologist Daina Majore was the first to successfully perform in vitro fertilisation in Latvia. She was awarded the highest Latvian civilian order possible- Order of the Three Star.

VALUES

- Responsibility
- Care
- Honesty
- Confidentiality

Dr Zane Vitina, Gynaecologist,
Reproductologist, CEO:

"Assisted reproductive technology (ART) has enabled millions of infertile couples worldwide to have children. ART mostly refers to manipulation of eggs, sperm and embryos outside the body in order to achieve a pregnancy. IVF involves the joining of eggs and sperm in a laboratory dish and transfer of the resulting embryos into the womb. ICSI is a variant in IVF in which a single sperm is injected into each egg. PISCI allows for the selection of healthy sperm capable of fertilizing a healthy egg in ICSI.

If procedure is not possible with your own egg or sperm, in Clinic EGV you can always use donor egg or donor sperm, or even make donor embryo. You can also store genetic material and embryos via cryopreservation. Different kinds of genetic tests are available as well.

Turn the page and learn more!"

EGV
CLINIC

BEST MEDICAL AND LABORATORY EQUIPMENT

Standards of hygiene, health and safety are in full compliance with the highest and strictest European requirements.

Clinic EGV qualifies annually for the ISO 9001 quality certificate, which ensures strict compliance with diagnostics and treatment standards.

LEADING TECHNOLOGIES

IVF, ICSI (PICS)

- Embryo cultivation in particularly enriched culture media
- Extended embryo culture till blastocyst stage
- Time-lapse incubator EMBRYOSCOPE+
- Assisted hatching/ Laser assisted hatching
- Genetic tests PGT-A, PGT-M, PGT-SR
- Embryo transfer with the assistance of implantation promoting culture media

ANDROLOGY CENTRE

- Minimally invasive surgery
- MICRO TESE, TESA
- Semen analysis according to WHO2010
- MAR test, HBA test, DNA fragmentation test, Sperm oxidative stress test

DONATION (Anonymous donors only)

- Egg Donation Program
- Donor sperm bank

GENETIC MATERIAL STORAGE

- Embryo and egg vitrification (freezing)
- Sperm freezing

ERA Test

Hysteroscopy, hysteroscopy

ANDROLOGY CENTRE

Clinic EGV is the only Andrology centre in Latvia.

It offers novel treatment for men's health, a modern Micro-TESE procedure and much more.

Minimally invasive surgical operations are also performed at the centre, including surgical restoration of fertility.

GENETIC TESTS

Especially for you, we provide the highest quality service in area of genetic testing:

- PGT-A (Preimplantation Genetic Testing for Aneuploidies)
- PGT-M (Preimplantation Genetic Testing for Monogenic Disease)
- PGT-SR (Preimplantation Genetic Testing for Structural Rearrangements)

EVEN AT 55 YEARS OF AGE!

Only a short time ago, a successful in vitro fertilisation procedure was performed for a 55 year-old woman

UNIQUE EXPERTS

- Gynaecologists,
- Reproductologists,
- Surgeons,
- Obstetricians,
- ESHRE certified ,
- Urologists,
- Andrologists,
- Anaesthesiologists,
- Radiologist,
- Endocrinologist,
- ESHRE Certified Nurses and Midwives,
- Registered Dietitian.

All of our physicians are members of the international reproductive health professional associations.
