Dr Ali Hamaad is a renowned expert consultant cardiologist based in the West Midlands providing a comprehensive range of treatments for patients suffering from heart problems and conditions including coronary artery disease, heart failure, arrhythmia, atrial fibrillation and syncope/blackout.

Dr. Hamaad qualified in 1999, gaining his medical degree from the University of Birmingham. After qualifying, he took part in the West Midlands Cardiology training programme, where he worked at some of the West Midlands leading cardiac centres. He also completed his MD thesis on the effect of the heart rate in cardiovascular disease being awarded his Doctorate in Medicine in 2009.

Dr Hamaad is able to provide a comprehensive range of tests and treatments for patients suffering from a variety of heart conditions. He has access to some of the most modern medical innovations available, so in most cases tests and results are available on the same day. He runs a 'one-stop' service, and is available for clinic appointments at short notice.

Dr Ali Hamaad is a recognised specialist with most major insurance companies. He works with a team of professionals at both of his private locations who are committed to ensuring patients receive the best possible treatment for their condition at the earliest time. Among his many clinical interests he manages the care of patients undergoing chemotherapy who require regular monitoring of their heart.

Dr Hamaad also provides a 'Healthy Heart Check' for patients who have concerns about the condition of their heart, or have a family history of heart problems. There are five separate packages available which each include a number of tests. Having a heart check can highlight any areas for potential concern or offer reassurance.
