

Bob Chatterjee

Consultant Spinal Surgeon
London

Based in London, Mr Bob Chatterjee is a full time Specialist Consultant Spinal Surgeon specialising in minimally invasive 'keyhole' spinal surgery techniques and non-fusion surgery for low back disorders.

Mr Bob Chatterjee is Clinical Director of Harley Street Spine and spinal lead at the Royal Free Hospitals NHS Trust. Skilled in the latest 'keyhole' techniques in spinal surgery and non-fusion surgery for low back disorders, he provides expert assessment and treatment for a wide range of spinal conditions, including low back pain, sciatica, slipped disc, spinal stenosis, neck pain, arm pain and spinal fractures.

Mr Chatterjee's philosophy is that finding the cause of spinal problems and explaining them succinctly to patients is the foundation of good treatment. He believes in his patients not only understanding their back, but also being aware of all the non-surgical as well as the operative treatment options. He works with outstanding physiotherapists, osteopaths, chiropractors, naturopaths and pain management specialists in a team-based approach to find the right solution in each case. Every single patient gets the same level of attention as he would give for any member of his own family.

Mr Chatterjee graduated from Guy's and St Thomas's Hospital in London, going on to undertake his initial training in spinal surgery in Oxford. He was awarded a Culyer Foundation research grant at the Royal National Orthopaedic Hospital in Stanmore where he gained a distinction for his research into bone regeneration.

After completing his Orthopaedic Specialist training in London, Mr Chatterjee was awarded a joint Neurosurgical and Orthopaedic Spinal Fellowship from the Royal College of Surgeons of England, training in spinal deformity and degenerative surgery at the Norfolk & Norwich Hospitals and in neurosurgery at Addenbrooke's Hospital in Cambridge.

Mr Chatterjee was appointed as a Consultant Spinal Surgeon at the Royal Free Hospitals NHS Trust where he has an exclusive spinal practice undertaking all forms of adult spinal surgery. Among many achievements, he is a spinal advisor to the National Health Service, is a consultant editor of several spinal periodicals and is currently President Elect for the orthopaedic section of the Royal Society of Medicine.
