

Demetrios Economides

Consultant Obstetrician &
Gynaecologist
London

Based at The Birth Company, 137 Harley Street, Demetrios Economides is a Consultant Obstetrician and Private Gynaecologist with over 34 years clinical experience. He is particularly experienced in the field of 3D/4D scans, and a whole range of private obstetrics and delivery procedures, including the management of miscarriage.

Mr Demetrios Economides is a Greek Consultant Obstetrician and Gynaecologist at the Royal Free Hospital, London, and Senior Lecturer in the Department of Obstetrics and Gynaecology at the Royal Free and University College School of Medicine.

Internationally recognised as an authority on obstetric ultrasound and problems in early pregnancy, Mr Economides offers pregnancy scanning at three private hospitals in London and a private outpatient clinic in Harley Street. He also provides expert prenatal testing, care and advice on recurrent miscarriages, pregnancy care and birth and gynaecology scans and surgery.

Mr Economides is the founder of Myscan, a service that offers private pregnancy scanning performed by expert and highly experienced staff, using the latest ultrasound technology, including 3D and 4D scanning. Myscan is available at four convenient locations in London: The Royal Free Hospital, The Portland Hospital, The Hospital of Saint John and Saint Elizabeth, and The Birth Company at 137 Harley Street.

Mr Economides is one of the country's leading experts on the use of 3D and 4D ultrasound scanning in pregnancy, and conducts all such scans performed at Myscan personally. Although not a replacement for the series of 2D antenatal ultrasound scans, 3D and 4D scanning produces a lifelike image of the fetus where some parts of the body, for example the face, can be clearly seen and detailed movements can be observed. These scans are usually performed between 25 and 32 weeks and cost £100. Mr Economides makes a full check of the baby and provides a detailed scan report. Many people also enjoy 'meeting' their baby for the first time this way, and a DVD recording and colour photographs are also provided as part of the service.
