

David Greenstein

Consultant Vascular Surgeon
London

Mr David Greenstein specialises in vascular surgery, providing premium private treatments at his clinic, the British Varicose Vein Centre. As well as treating varicose veins, Mr Greenstein treats a vast range of vascular conditions including TIA's, aortic aneurysms, intermittent claudication and facial blushing.

A special interest is held by Mr Greenstein is the modern management of venous disease varicose veins and Deep Vein Thrombosis (DVT). Mr Greenstein utilises only the latest advancements in medical technology, and successfully incorporates them into his treatments for varicose veins and varicose leg ulcers. The state-of-the-art techniques that Mr Greenstein uses include radiofrequency treatment, ClariVein treatment and Glue-ing varicose veins. Furthermore, he is regarded as an expert in treating varicose veins associated with pregnancy and pelvic veins.

Also a pioneer in the modern management of DVT and treating swollen legs, Mr Greenstein has developed modern techniques for restoring legs to normality. His techniques often involve stenting and the use of special clot busting drugs, and mechanical devices that can suck out clots.
