<http://www.drSarahClarke.com/>

Dr Sarah Clarke is a leading heart specialist with an NHS and private practice that covers all aspects of heart disease and cardiology. Performing up to 750 coronary interventions per year with a success rate higher than 98%, she is one of the most experienced practitioners in this field in the UK.

Dr Clarke studied medicine at Girton College, University of Cambridge where she obtained a BA in 1987 and MB BChir in 1989. Following junior hospital posts in the region her specialist training was undertaken at Addenbrooke's and Papworth Hospitals. She was awarded a fellowship in interventional cardiology at the Massachusetts General Hospital and Harvard Medical School, University of Harvard, Boston, USA in 2001. Dr Clarke gained extensive experience in all aspects of interventional cardiology and vascular intervention. She was awarded her research Doctorate in Medicine (MD) in 2004, by the University of Cambridge, UK.

Dr Clarke is experienced in the use of advanced interventional devices to treat complex coronary lesions or narrowings including rotablation for heavily calcified (hardened) lesions, intravascular ultrasound (IVUS) for evaluation of coronary narrowings, pressure wire for assessment of the significance of a coronary narrowing, and devices designed to cross chronically occluded or blocked arteries. She is a proctor for rotablation training for the British Cardiovascular Intervention Society.

As well as being an experienced interventional cardiologist, Dr Clarke also has extensive general cardiology experience. She developed and introduced Papworth Direct a rapid access diagnostic service in the NHS sector and has been involved regionally and nationally in audit and clinical pathway design focussing on the patient to ensure high quality, cost effective care.

Dr Clarke is a member of several advisory boards for the cardiovascular industry and is also the Book Editor for Cardiology News, a cardiology journal.

All this experience extends into Dr Clarke's private practice where she consults for all aspects of general cardiology (including chest pain, murmurs and valvular disease, palpitation, dizziness and blackout, shortness of breath, heart failure and hypertension or high blood pressure) as well as offering interventional procedures (coronary angiography and coronary intervention) including advanced techniques for complex coronary lesions.

Accreditation and Admitting Rights

Sarah Clarke is an accredited consultant for the following hospitals, clinics and groups

Specialises in

- Chest pain, angina
- Murmurs and valvular disease
- Palpitation, arrhythmia
- Dizziness and blackout
- Shortness of breath
- Heart failure
- Hypertension (high blood pressure)
- Coronary angiography
- Interventional cardiology

Professional Details

Qualifications

MA, MD, FRCP, FESC, FACC
Qualified in 1989
