Professor Kefah Mokbel is a leading oncoplastic breast surgeon specialising in the treatment of breast disease. Based at the London Breast Institute of The Princess Grace Hospital in Marylebone, he provides a comprehensive range of breast services including expert assessment and treatment of breast cancer and non-cancerous breast conditions and cosmetic breast surgery.

A highly respected breast cancer surgeon, Professor Mokbel was named in Tatler magazine's Best Doctors Guide as one of the featured 'Top Breast Surgeons' in 2006 and 2007 and was named in the Times magazine's list of Britain's Top Doctors in 2010.

Professor Mokbel graduated in medicine from the University of London in 1990. During his undergraduate training at The London Hospital Medical College, he was awarded a number of prestigious prizes. He qualified as a Fellow of the Royal College of Surgeons (FRCS, England) in 1994 and was granted the Master of Surgery degree in 2000 by The Imperial College of Science, Technology and Medicine for his research in the field of molecular biology of breast cancer. Following this specialist accreditation, he was appointed as a substantive Consultant Breast Surgeon to St George's Hospital, and as an Honorary Senior Lecturer in Surgery.

In 2002, Professor Mokbel was appointed a Professor at The Brunel Institute of Cancer Genetics and Pharmacogenomics at Brunel University in London in recognition of his contribution to breast cancer research. In 2005, he was appointed as a Reader in Breast Surgery at St George's University of London.

In addition to his expertise in breast cancer surgery, Professor Mokbel is the founding president of Breast Cancer Hope, a UK-based charity aimed at improving the quantity and quality of life in women with breast cancer.

He is a member of the editorial board of several international medical journals and a member of the medical advisory committee at the Princess Grace Hospital. The current chairman of the breast multidisciplinary team of the London Breast Institute, Professor Mokbel is also a member of the medical advisory board of several biotechnology companies including Everything Genetic, Myriad Genetics and Q Medical Technologies.
