Fees

Initial Consultation **£250**

Follow-up Consultation **£150**

Mr Dan Fagan is Consultant Spinal Surgeon at SpineArt in Yarm, a specialist clinical network covering the Northeast and North Yorkshire. Supported by kind and knowledgeable professionals and with access to high quality private healthcare facilities, he provides the best quality care for patients with problems affecting the neck and back such as sciatica, slipped disc, cervical spondylosis, osteoporosis and spinal stenosis.

Mr Fagan qualified from Bristol University in 1995 and went on to train in some of the UK's most prestigious spinal centres. Having worked in the NHS for 18 years, he is now devoted to full time private practice focusing exclusively on spinal disorders.

Well known for his sympathetic, kind and friendly manner, Mr Fagan has a special interest in state of the art treatment of conditions giving rise to back and neck pain in adults, such as slipped disc, spinal stenosis or stress fractures (spondylolysis). Offering an acute radiculopathy service based on rapid expert assessment and treatment, he aims to get patients back to work or sport in the shortest time possible.

Mr Fagan is skilled in surgical and non-surgical techniques to treat neck and back pain. He has considerable experience in advanced adult reconstruction surgery and, as a recognised expert in Minimally Invasive Surgery for back pain, has lectured and trained other consultants in these techniques both nationally and internationally.

Mr Fagan has acted as an advisor to the National Institute of Clinical Excellence (NICE) and regularly provides treatment to professional sportsmen and sportswomen.

Mr Fagan leads SpineArt, a multidisciplinary clinical network providing comprehensive care for back and spinal problems, from initial assessment through to postoperative physiotherapy. With access to an onsite MRI scanner, their aim is to offer the best care for elective spinal surgical patients in the region.
